

THE LIFE OF A PLASTIC SODA BOTTLE

To make one sweatshirt, 25 plastic bottles must be recycled, melted, and cut into

pieces. Then the pieces are melted again and turned into thread that is spun into cloth.

What a great way to reduce, reuse, and recycle!

If you want your plastic soda or water bottle to have a long and productive life, recycle!

SURF'S UP!

You can surf the net and find out even more fun facts about recycling and the environment. Check out these exciting sites:
